

Chrome Delete Steering Wheel Emblem

Friday, July 17, 2026 1:50 PM

First thing I wanted to do was delete the last bit of chrome on this premium SR5 package. Main reason I went with this package is because all badges were blacked out already and most other trim color match painted!

I had to do a lot of plastidip on my Taco to delete some chrome. Didn't want to do that this time.

Here's the first one I did which was adding an overlay to the chrome steering wheel T symbol.

Before:

After:

Got these on Amazon at this link <https://a.co/d/9Pyb2OQ>

If the link is dead or product unavailable from the seller when you see this, just type in Google or Amazon "Tundra 2024 steering wheel emblem overlay". This should get you to a source that has something. This one only cost me \$29.99
