

Lutz Auto Speedo calibrator

Tuesday, August 11, 2026 1:38 PM

I also installed the Lutz Auto Speedo calibrator. It was very straight forward and came with excellent instructions. I read some positive things on this from the ih8mud forum guys with the 100 series and thought I'd give it a try. This was the only offering I could find for our 1st gens.

Here's a pic as it was when I plugged in and was adjusting the increments.

I ended up at +12 clicks - this means I pushed the "+" button 12 times and was spot on. This is with going from stock tire size to 33s.

Then here it is wrapped up against the tcase. I tried to get it away from the exhaust. I'll check up on it from time to time to see if I need to relocate it. I wrapped some heat resistant wire wrap around it all after taking this pic.
